

XXIST WORLD CONGRESS OF PSYCHIATRIC GENETICS

REDEFINING MENTAL ILLNESS THROUGH GENETICS

POSTER DISCLOSURES

OCTOBER 17-21, 2013
BOSTON, MASSACHUSETTS

DISCLOSURE STATEMENT

In accord with the standards set forth by the ACCME, speakers and program committee members have been asked to disclose any relationship to companies producing pharmaceuticals, medical equipment or other relevant products or services which might be germane to the content of the Congress within the past 12 months. Financial Relationships are those relationships in which the individual benefits by receiving a salary, royalty, intellectual property rights, consulting fee, honoraria, ownership interest (e.g., stocks, stock options or other ownership interest, excluding diversified mutual funds), or other financial benefit. Financial benefits are usually associated with roles such as employment, management position, independent contractor (including contracted research), consulting, speaking and teaching, membership on advisory committees or review panels, board membership, and other activities for which remuneration is received or expected. ACCME considers relationships of the person involved in the CME activity to include financial relationships of a spouse or partner. The ACCME has not set a minimum dollar amount for relationships to be significant. Inherent in any amount is the incentive to maintain or increase the value of the relationship.

Poster Disclosures

Asherson, Philip - Janssen, Lilly, Novartis, Shire, Vifor
